Bacteria (/ b æ k t ? r i ? / ()); common noun bacteria, singular bacterium) are a type of biological cell. They constitute a large domain of prokaryotic microorganisms. Typically a few micrometres in length, bacteria have a number of shapes, ranging from spheres to rods and spirals. Bacteria were among the first life forms to appear on Earth, and are present in most of its habitats. *Staphylococcus aureus* and *Escherichia coli* were enumerated and isolated from ready-to-eat vegetables salad and meat luncheon on their selective media (Baird-parker and Macconkey agar, respectively). Twenty suspicious colonies of each (10 from each product) were randomly chosen and identified using conventional based on morphological and physiological characteristics.
