Bridgeport is a historic brand of milling machine and machining center produced by Bridgeport Machines, Inc. from 1938 to 2004, and machine tool conglomerate Hardinge, Inc. since. If you have lumber to mill, you know the importance of selecting a solid milling machine. The Bridgeport milling machine is one of the oldest and most popular machines in the small and mid-size category of milling machines. You have a store of high-quality lumber that is just waiting for someone to mill it and turn all that wood into furniture, art, and more. With a used CNC milling machine, the milling process is no problem at all. As the UK's stocking distributor for MACH Machine tools, we can supply manufacturers with best-in-class manual milling machines, lathes, drills, grinding machines and a range of other workshop equipment that all carry the iconic MACH Machine Tools' brand. Our product range also includes cnc machines, used lathes, xyz machine tools, CNC machinery, used milling machines and used machine tools.
