The author is Richard Dawkins, who just happens to be one of my favorite authors. I read this book years ago, when I developed an interest in learning more about evolution. I liked the book so much, that I bought copies for my four adult children. Climbing Mount Improbable is a 1996 popular science book by Richard Dawkins. The book is about probability and how it applies to the theory of evolution. It is designed to debunk claims by creationists about the probability of naturalistic mechanisms like natural selection. By . Climbing Mount Improbable by Richard Dawkins, Viking, £20, ISBN 0 670 85018 7. THERE'S a male spider Richard Dawkins writes about that woos its mate by attaching a string to her web and ...
