We use a consultative approach, working with you and your team. Consultation and Research. We actively listen to understand your data analysis needs, wants, problems and concerns, so that we can formulate the optimal solution for your situation. AQTESOLV now incorporates a powerful tool for analyzing pumping tests in bounded aquifers. Not only can you simulate simple problems with single boundaries, but you also can evaluate up to four boundaries! The method of images is a well-known technique for mathematically incorporating the effect of boundaries into the drawdown calculations for a bounded aquifer.
