Genetically modified food controversies are disputes over the use of foods and other goods derived from genetically modified crops instead of conventional crops, and other uses of genetic engineering in food production. The disputes involve consumers, farmers, biotechnology companies, governmental regulators, non-governmental organizations, and scientists.

The AMC Pacer is a two-door compact car produced in the United States by the American Motors Corporation from 1975 to 1979, sold out in 1980.. Design work began in 1971. The rounded shape and large glass area were unusual compared with the three-box designs of the era. The Pacer's width is equal to full-sized domestic vehicles at the time, and this unique design feature was promoted by AMC as ...

Information for publishers. Associations and other publishers who wish a review of new books, CDs, or software related to cost engineering, quantity surveying, or project management to be included on this page should send desk copies, with pricing and ordering information to:
