If you read the manual, they last longer. I'll call bullshit on your exaggerated feedback. I have a 2007 ford focus, 150k freedom units, that i've never changed the transmission fluid on it. I bet you, \$50 to a charity of your choosing, that when I replace the fluid, the transmission will run better. It'll take me all of 20 minutes. [Honda Manual Transmission Tips; Automatic Transmissions. ... Diagnosing Noises in Your Car. Special Notes on Honda Differential Noise ...](#) The reason I bring this up is because I have seen Honda differentials cause noise from time to time. Often the first thing I do in this situation is change the differential fluid. [Honda Element Transmission Problems.](#) See our lemon odds and nada odds page to see vehicles with no repairs or vehicles with more than three repairs. (146,000 miles) The car has a very loud rotational noise coming from under it while driving. The best I can describe, is a very loud clicking. The clicking/noise gets louder and the frequency increases with speed. The noise also goes away when the clutch is depressed.
