

Download How To Build Tall Case Grandfather Clock Easy Plan Diy Plan

Miter the front molding pieces and glue them in place. Fit the miters on each side piece before cutting them to length. Glue the miter joint and the first 2 or 3 in. of the side molding. At the back, fasten each side piece with a screw from inside the case, to allow seasonal movement. Making a Grandfather clock requires expert woodworking skills. All of these free grandfather clock plans use a prebuilt clock movement. It is important that you purchase the clock movement before you start making the grandfather clock as it may be necessary for you to adjust the dimensions in order to fit your clock mechanism into the case.
