Precision Automation Specialists** For more than 35 years, the world's top manufacturers have relied on Epson Robots to reduce production costs, improve product quality, and increase their bottom line. An industrial robot is a robot system used for manufacturing. Industrial robots are automated, programmable and capable of movement on three or more axis. Typical applications of robots include welding, painting, assembly, pick and place for printed circuit boards, packaging and labeling, palletizing, product inspection, and testing; all accomplished with high endurance, speed, and precision. **Polaris Multi-Process Assembly Cell.** Polaris Multi-Process enables flexible automation of traditionally manual, end-of-line assembly processes. Multiple operations can be performed in a single cell, including dispensing, vision inspection, screw driving, pick and place, bar code reading, labeling, and many other operations.
