

Download Innovations In Urologic Surgery

Latest Innovations In Urologic Surgery Building on an already robust minimally invasive surgery program at BMC, the da Vinci® Surgical System provides surgeons with an alternative to both traditional open surgery and conventional laparoscopy, putting the surgeon's hands at the controls of a state-of-the-art robotic platform. Three recent innovations that are improving kidney stone surgery in a variety of ways, include new holmium laser technologies, miniaturized surgery, and disposable ureteroscopes. Innovations in robotic surgery : Current Opinion in Urology Urologic surgery continues to be at the forefront of the revolution of robotic surgery with advancements in

The 24th Annual Innovations in Urologic Practice conference will provide a detailed review and commentary on multiple genitourinary and urologic diseases. Latest Innovations In Urologic Surgery Building on an already robust minimally invasive surgery program at BMC, the da Vinci® Surgical System provides surgeons with an alternative to both traditional open surgery and conventional laparoscopy, putting the surgeon's hands at the controls of a state-of-the-art robotic platform. ...Download Innovations In Urologic Surgery Latest Innovations In Urologic Surgery Building on an already robust minimally invasive surgery program at BMC, the da Vinci® Surgical System provides surgeons with an alternative to both traditional open surgery and

Recent Innovations in Kidney Stone Treatment. Learn the benefits of a new high-powered laser, miniaturized surgery, and single-use ureteroscopes. Three recent innovations that are improving kidney stone surgery in a variety of ways, include new holmium laser technologies, miniaturized surgery, and disposable ureteroscopes. Purpose of review Developments in robotic surgery have continued to advance care throughout the field of urology. The purpose of this review is to evaluate innovations in robotic surgery over the past 18 months. Recent findings The release of the da Vinci Xi system heralded an improvement on the Si ...About Innovations in Urologic Practice. Innovations in Urologic Practice (IUP) is an annual CME-accredited conference devoted to updating urologists on the rapidly changing healthcare environment. Topics focus on innovative diagnostic and treatment strategies, controversies, new and currently developing technologies, and challenges in today's urologic practice. Robotic Surgery. The UCLA Department of Urology collaborated with the Department of Surgery to open the Center for Advanced Surgical and Interventional Technology (CASIT) in 2002. The Center promotes clinical, educational and research use of surgical robots and digital imaging in surgery and medicine. New procedures in BPH are less invasive than many older choices, with good results and comfortable recovery. Learn more in this CareBlog article about innovations in treatment of BPH.
