Current Clinical Urology

Male infertility refers to a male's inability to cause pregnancy in a fertile female. In humans it accounts for 40–50% of infertility. It affects approximately 7% of all men. Male infertility is commonly due to deficiencies in the semen, and semen quality is used as a surrogate measure of male fecundity. Infertility is “a disease of the reproductive system defined by the failure to achieve a clinical pregnancy after 12 months or more of regular unprotected sexual intercourse (and there is no other reason, such as breastfeeding or postpartum amenorrhoea). Primary infertility is infertility in a couple who have never had a child. Research The Department of Urology has an outstanding research program that is at the core of its mission. Dr. Spitz named a ‘Physician of Excellence’ award winner . LAGUNA HILLS, Calif. (Nov. 9, 2017) – For the fourth consecutive year, Dr. Aaron Spitz of Orange County Urology Associates has been selected as a 2017 "Physician of Excellence" by the Orange County Medical Association.
