HitchAIRCRAFT LOADING AND UNLOADING PROCEDURES ... quirements in airborne weapons/stores load-ing manuals and the NATOPS manuals. ... area to load or download an aircraft. Normally, theFREE Aircraft Manuals Cessna, Piper, Raytheon, etc : To download file, right click on "Click Here" and select "Save Link As" Have some manuals to upload and share with others?be tied-down. Tie-down of loads to aircraft structure is achieved by straps or nets connected to the tie-down points located on the cargo hold floor. Each tie-down point is designed to an ultimate load of 906kg, in any direction. A minimum clearance of 5 cm must be kept between any load and compartment hold ceiling. 1.1.4.1.2.Aircraft loads are those forces and moments, or loadings, applied to the airplane structural components (the wing, horizontal tail and the fuselage, for instance) to establish the required strength level of the complete airplane. These loadings may be caused by air pressure (lift), inertia (mass, weight) forces or ground reactions during take ...
