Description: ... The Mazda Cosmo was an elegant and powerful coupe that was far ahead of its time. It was conservatively styled, but extraordinarily engineered! One of the biggest short comings of these 20B Triple Rotor cars was the automatic transmission. Mazda never offered the Cosmo with a manual. This one's had a conversion done, and it's for sale in the US. You should buy it. I was looking around in DMRH home page, and I found that there are some Cosmo that says that they have a manual gearbox conversion, with FD rx7 transmission and bell housing. I was wondering do they speedometer keep working with the manual transmission? If they do, how its keep working? does it use the same speedometer sensor as the FD? or what they do to make it work?
