This site is intended as a resource for university students in the mathematical sciences. Books are recommended on the basis of readability and other pedagogical value. Topics range from number theory to relativity to how to study calculus. Visualization. The Euclidean algorithm can be visualized in terms of the tiling analogy given above for the greatest common divisor. Assume that we wish to cover an a -by- b rectangle with square tiles exactly, where a is the larger of the two numbers. We first attempt to tile the rectangle using b -by- b square tiles; however, this leaves an r -by- b residual rectangle untiled, where $r < b$. Deep learning algorithms, in particular convolutional networks, have rapidly become a methodology of choice for analyzing medical images. This paper reviews the major deep learning concepts pertinent to medical image analysis and summarizes over 300 contributions to the field, most of which appeared in the last year.
