

# Download Refinery Turnaround Manuals

This manual illustrates turnaround project organization and communication, and states the general rules and regulations that apply during the Port Arthur BFLP – Cracker and Sabina – C4 Turnarounds. The manual's accepted standards and procedures for BASF- employees, contract personnel, and contractors. Preparing for a refinery turnaround is no easy task. Large, medium or small, all turnarounds can be challenging, and some require years of thought and debate before actual event planning can even begin. And that can often be the easy part. Once timing is decided, things become even more hectic and can easily spiral out of control. Turnaround management in an oil refinery. Owing to the heavy impact of plants shutdown for controlling and repairing oil refinery equipments both in terms of production loss and of major maintenance costs it is of vital importance to clearly assess which maintenance task have to be included in the schedule. dominantly refinery own employees work in the refinery, during the turnaround over 2500 additional external employees of cleaning and maintenance companies and different specialized firms work there. The TRBS 1112 requires the operator of the plant to provide close coordination of different internal and external organizational
