

Download Scotts Reel Mower Adjust Height

Adjust Cutting Height Below 2 Inches. Remove the hubcap from the center of one of the reel mower wheels. There are two notches between the hubcap and the wheel. Insert a flat-head screwdriver into one of the notches, and pry the hubcap off the wheel. How to Adjust a Scotts Reel Mower. Reel mowers, like gas mowers, can be adjusted to cut the grass at different heights. Setting to a higher level will leave grass longer, which is preferred during the hottest months since longer grass requires less watering. The lowest settings are best to use early in the mowing season and for the last cutting in... The Scotts Classic Push Reel Mower is an excellent reel mower to get the job done around your lawn. There are multiple ways to adjust the cutting height, in order to ensure that you get the best ... 1. Set the reel mower on a table or work bench for easy access to the reel. Chock the wheels with small wood blocks to prevent them from moving and turning the cutting blade cylinder.
