

Download Sex And Gender Differences In Personal Relationships

Sex differences in humans have been studied in a variety of fields. In humans, biological sex is determined by five factors present at birth: the presence or absence of a Y chromosome, the type of gonads, the sex hormones, the internal reproductive anatomy (such as the uterus), and the external genitalia. Genetic sex is determined solely by the presence or absence of a Y chromosome. Sex differences in psychology are differences in the mental functions and behaviors of the sexes, and are due to a complex interplay of biological, developmental, and cultural factors. Differences have been found in a variety of fields such as mental health, cognitive abilities, personality, and tendency towards aggression. Such variation may be both innate or learned and is often very difficult ... Abstracts of Dr. Gregory Herek's publications. Gregory M. Herek, Ph.D. Bibliography: Selected Abstracts : Herek, G.M. (1984). Beyond "homophobia": A social ... What are the differences between sex, gender, and gender identity? It's common for people to confuse sex, gender, and gender identity. But they're actually all different things.
