

Download Silicon Sandblasting Manual

Comco Inc. is the leading manufacturer of MicroBlasting technology. Based in Burbank, CA for over 50 years, we design, build and sell micro-abrasive blasting equipment and supplies. Our Manus warehouse gives us the flexibility to stock a broad selection of your most common blasting abrasives including: Enviro-Grit glass media, various slags including nickel and coal, premium grade hard-rock blasting garnet and water-jet garnet, glass bead, brown and white fused aluminum oxides, cast steel shot and grit, ceramic media, Armex Soda, walnut shells, and plastic media to name a few. Abrasive blasting, more commonly known as sandblasting, is the operation of forcibly propelling a stream of abrasive material against a surface under high pressure to smooth a rough surface, roughen a smooth surface, shape a surface or remove surface contaminants. A pressurised fluid, typically compressed air, or a centrifugal wheel is used to propel the blasting material (often called the media). This website uses cookies to improve your experience.
