Problem solving activities provide a way to relate classroom learning to authentic hands-on real-world situations. Problem solving can help students to develop decision making skills, critical thinking, autonomy, communications, negotiations, team building, and personal responsibility for learning. This post is a continuation of the series of cognitive therapy ideas taken from a student project by Janelle Barrett (who is not a student anymore!). Learning Methods - Thinking Styles - Teaching Methods There are many different ways a person can learn something. Some learning methods work better than others. The bottom line is, you can learn anything you want, which means the possibilities are endless. Excite your students with this hands-on bundle! Students will focus on the structure of the Earth, the movement of Plates, and the creation of Earthquakes and Volcanoes all while creating an Interactive Notebook and using their knowledge to complete activities and projects.
