

# Download Vipre Business Premium Manual

Due to changes from Microsoft in the Server 2016 architecture, Windows Defender Antivirus will not disable itself when other antivirus products are detected. Hello all - here's what I've found so far. 1) We don't use the Windows Firewall, we use VIPRE Business Premium. 2) I checked anyway, and the Windows Firewall is OFF. Sophos Home is feature-rich, but most of those features are only provided to Premium users. We'll talk more in the next section about why we think an upgrade to Premium is worth it, but, for now ... This is what I get at every startup in the notification area: "Device driver was not successfully installed" When I click on the message I get a window that says: "Device driver was not successfully installed. Microsoft WPD Enhanced Storage Password Driver ---- Failed"
